ALGEE	RA-2 TABLE OF CONTENT		CCSF INSTRUCTOR: GRACE G. IMSON
1-1	Patterns and Expressions	8-1	Inverse Variations
1_2	Properties of Real Numbers	8-2	Reciprocal Function Family
1 2		8-3	Rational Functions and Graphs
1-3		8-4	Rational Expressions
1-4	Solving Equations	8-5	Add & Subtract Rational Expressions
1-5	Solving Inequalities	8-6	Solving Rational Expressions
1-6	Absolute Value Equation & Inequalities	9-1	Mathematical Patterns
2-1	Relations and Functions	9-2	Arithmetic Sequences
2-2	Direct variation	9-3	Geometric Sequences
2-3	Linear Functions & Slope-Intercept Form	9-4	Arithmetic Series
2-4	More About Linear Equations	9-5	Geometric Series
2-5	Linear Models	10-1	Exploring Conic Sections
2-6	Families of Functions	10-2	Parabolas
2-7	Absolute Value Functions & Graphs	10-3	Circles
2-8	I wo variable inequalities	10-4	Ellipses
3-1	Solve Systems Using Tables & Graphs	10-5	Hyperbolas
3-2	Solve Systems Algebraically	10-6	Translating Conic Sections
3-3	Systems of Inequalities	11-1	Permutations & Combinations
3-4	Linear Programming	11-2	Probability
3-5	Systems With Three Variables	11-3	Probability of Multiple Events
3-0	Systems Using Matrices	11-4	Conditional Probability
4-1	Quadratic Functions and Transformations	11-5	Probability Models
4-2	Quadratic Equation – Standard Form	11-6	Analyzing Data
4-5	Quadratic Functions – Modeling	11-7	Standard Deviation
4-4	Ouadratic Equations - Solvo	11-8	Samples and Surveys
4-5	Completing the Squares	11-9	Binomial Distribution
4-0	Quadratic Formula	11-10	Normal Distribution
4-7 1-8	Complex Numbers	12-1	Adding & Subtract Matrices
4-0 4-9	Quadratic Systems	12-2	Matrix Multiplication
5-1	Polynomial Functions	12-3	Determinants and Inverses
5-2	Polynomials, Linear Factors, Zeros	12-4	Inverse Matrices & Systems
5-3	Solve Polynomial Functions	12-5	Geometric Transformations
5-4	Dividing Polynomials	12-6	Vectors
5-5	Theorems About Roots of Polynomial Equations	13-1	Exploring Periodic Data
5-6	Fundamental Theorems of Algebra	13-2	Angles & Unit Circle
5-7	Binomial Theorem	13-3	Sing Function
5-8	Polynomial Models in Real World	13-4	Sine Function
5-9	Transforming Polynomial Functions	13-5	Cosine Function
6-1	Roots and Radical Expressions	12 7	Translating Sing & Cos Eurotions
6-2	Multiplying & Dividing Radical Expressions	12_0	Reciprocal Trigonometry Functions
6-3	Binomial Radical Expressions	1/-1	Trigonometry Identities
6-4	Rational Exponents	1/-1	Trigonometry Equations use Inverse
6-5	Solve Square Root & Radical Equations	1/1-2	Trigonometry Ratios & Right Triangles
6-6	Function Operations	1/1_/	Law of Sines & Area
6-7	Inverse Relations and Functions	1/1-5	Law of Cosines
6-8	Graphing Radical Functions	14-6	Angle of Identities
7-1	Exploring Exponential Models	14-7	Double Angle & Half Angle Identities
7-2	Properties of Exponential Functions	1 - 1 /	
7-3	Logarithmic Function as Inverses		
7-4	Properties of Logarithms	Instruct	tor: Grace Imson
7-5	Exponential & Logarithmic Equations	instruc	
7-6	Natural Logarithms
